You are cordially welcome to attend the 5th IEEE International Conference on Computer and Communications (ICCC) which will be held during the period of December 6-9, 2019 at Chengdu.

ICCC was launched in 2015, sponsored by IEEE and Sichuan Institute of Electronics, supported by Southwest Jiaotong University, etc. Thereafter, it is held at Chengdu annually. Last year ICCC 2018 had more than 600 attendees from all over the world. ICCC brings together active participants and researchers looking for opportunities to showcase their research results and meet professionals in their fields. From the successful established ICCC conference history in the past as shown by the feedback, acceptance rate, and registration number, I urge you all to take advantage of this year’s ICCC to share with participants the state-of-the-art developments and cutting-edge technologies in the broad areas of computer & communications.

I am sure that this conference will bring along in-depth discussion and research presentations in cutting-edge science and technology, provide a platform for communication between scholars and scientists, promote communication between domestic and foreign participants, and strengthen the connections between academia and industry.

On behalf of the conference organization team, we sincerely hope you will enjoy a very pleasant conference exposure at the Panda City – Chengdu this year.

Best Regards,

Prof. Steven Guan, Xi’an Jiaotong-Liverpool University, China
